

## BioPreparation Saved This Cat's Life

*We had a cat that came to our hospital that had not eaten in 4 days. All lab tests and blood work were negative. Further examination found absolutely nothing wrong with the cat but it was still dying. At the suggestion of Russell Louie, owner of Optimum Choices, I gave the owner some BioPreparation F2+ and told him to mix it in water and squirt it into the cat's mouth. The cat started to eat and drink a little by the end of the day. By the next day the cat was eating normally and totally recovered. I never figured out what was wrong with the cat but the owner was very thankful that BioPreparation literally saved his cat's life.*

A handwritten signature in black ink, appearing to read "Michael King DVM". The signature is fluid and cursive, with the "DVM" part being more distinct and larger than the name.

Dr. Michael King, DVM

(Editor's note)

How did BioPreparation save this cat's life? It didn't. BioPreparation simply supplied the body with the super nutrients of Vitamins A, B-complex, C, D, E and F, Omega 3, 6, 9 and GLAs (gamma linolenic acid found in mother's milk), over 4,000 enzymes, 20 amino acids, phytonutrients, chlorophyll, all known trace minerals and elements and thousands of other nutrients so the body could heal itself naturally and holistically. BioPreparation did not treat the symptoms (in this case the source of the illness was unknown) but provided the life spark, cellular fuel and holistic balance the animal's body needed so life could resume. When the brain is alive with energy, the endocrine and immune systems are fully functional and the proper fuel is supplied to the cells, everything will work like it should. BioPreparation is not a supplement but contains four specific algae. Algae are native to all animals' diets so their bodies and cells' DNA know what to do with it and put it to work immediately without having to break down binders and fillers like supplements. BioPreparation is such a revolutionary product (concept) it is 100 years ahead of its time. Now that's true holistic wellness!

*These results are individual testimonials. We cannot guarantee your animal's results will be the same. Since each animal's body responds differently to the super nutrition in BioSuperfood/BioPreparation your results will be different. These statements have not been evaluated by the FDA. This information is not intended to diagnose, treat, prevent or cure any disease.*
